

Food Snowbird Release form

The Sunset Celebration has 10 locations for food vendors each night. This is part of our agreement with the city. When we have 10 approved food vendors, spots are often unused because every food vendor does not come every day.

The Sunset Celebration is creating a new category of food vendor, Snowbird Category. Any food vendor approved to work as of 6/3/2015 are regulars, Food vendors approved after 6/3/2015 are Snowbirds. A snow bird may become a regular based on seniority when there are less than 10 regulars and with the board's approval. Snowbirds will be required to participate in a nightly lottery ½ an hour before artist lottery. At that time the pier manager will supervise them as they will draw from the snowbird bucket and then choose spaces based on what's available. Regular food vendors who have not called in or who aren't present are no longer guaranteed a spot if none are available. Regular food vendors do not need to do the lottery but will choose spaces before the lottery in the traditional way.

If there are more Snowbirds than space allows, the vendors who do not get spaces will not be able to set up that day. By choosing to participate in this system the person signing below is agreeing that The Sunset Celebration and CPS are not required to give a space except in the method described above. This may result in food going to waste and loss on income as well as other problems not listed here. It is the responsibility of the food vendor to deal with these any other problems arising from this situation. If this will result in hardship the undersigned should please change the business model to allow for these events, or else they would be wise to not participate in the program.
